

Awesome service
guarantee for
your home A/C!

Read on and find out how.

The Cox and Thornsberry families, proud owners of The Comfort Authority.

You need to check out The Comfort Authority. Why? 'Cause we're different.

Ask yourself this - if most businesses promise exceptional customer service, then why is it that we're so impressed when they actually deliver? Because they so rarely do! **We know the number one priority is the customer experience.** That's why we created The Comfort Authority.

If you think exceptional customer service is important, then call The Comfort Authority and experience the difference for yourself. You deserve it.

Of course we are in business to earn money, we have to eat (and pay our cell phone bills) just like everyone else. We have this crazy concept, though, that to be successful you have to ^{love} like us. You have to rave about us to your neighbors, co-workers, family and friends so much that the only way to quiet you down is for them to use our services, too. So how do we make you love us?

We asked ourselves what made US rave about other companies the way we want you to rave about us. Our favorite companies listened, were straightforward, professional and delivered what they promised. That's exactly what we do!

Seeing is believing, so right now we are offering - for only \$89 - a whole home comfort assessment, A/C tune-up, duct sanitizing and duct and insulation inspection so thorough that we will give you two powerful ~~guarantees:~~ ^{promises:}

1. If we didn't deliver awesome service you let us know and we won't charge you a dime.
2. If your A/C doesn't run fine until its next annual service we will figure out why - at no charge - or give you your money back.

Call us now at **813-579-6358** to make your reservation. You are SO going to love us!
